

ARBUTUS ANALYZER INTERMEDIATE TRAINING

LEARNING OBJECTIVES

This four-day course, delivered in half-day segments, is designed to demonstrate how to apply Analyzer functionality to data analytics projects using a structured approach. This will be accomplished through five case studies that cover data integrity verification, travel and entertainment expenses, vendor management, IT passive directory accounts and terminations, and automation. The key objectives include:

- Develop your skills in devising an efficient data analysis plan to achieve your goals
- Refresh your knowledge of and experience with basic Analyzer functionality
- Identify and apply the Analyzer functionality needed to achieve objectives
- Break analysis objectives into structured, manageable steps
- Familiarize yourself with common data analysis tasks and scenarios
- Identify and follow best practices
- Create a procedure to automate analysis tests

METHODOLOGY

This is an internet based, instructor-led course. The course incorporates hands-on case studies which enhances the learning process by seeing how typical audit/data analysis tests are conducted in Arbutus Analyzer.

REGISTRATION

To register, go to <https://www.arbutussoftware.com/en/arbutus-live-virtual-courses>.

ADDITIONAL INFORMATION

Field of Study: Computer Software & App
