Arbutus Release Notes

------ SHIP VERSION 8.00 Build 2264 4/10/24 ------

* Fixed an issue with server compression impacting SAP imports when using SmartLink

------ SHIP VERSION 8.00 Build 2263 4/10/24 ------

* Fixed an issue with SAP imports in Workflows using SmartLink that was not returning data correctly

* Fixed an issue with SmartLink in Workflows where SAP data fields did not import correctly if local compression was on

* Added SAP ERP connector to install options

------ SHIP VERSION 8.00 Build 2262 3/26/24 ------

* Fixed issue in Admin->Manage All Activations

------ SHIP VERSION 8.00 Build 2260 3/15/24 ------

* Added diagnostics for RM

------ SHIP VERSION 8.00 Build 2259 3/13/24 ------

* Added SSO for certain group licenses

------ SHIP VERSION 8.00 Build 2258 3/7/24 ------

* Added updated Oracle HCM Cloud connector

------ SHIP VERSION 8.00 Build 2257 2/26/24 ------

* Fixed delimited file issues

* Fixed BACKGROUND mode for SmartLink

* Fixed an issue with APPEND for Workflows and improved the speed

------ SHIP VERSION 8.00 Build 2256 2/14/24 ------

* Fixed an issue with GROUP producing incorrect result while assigning variables

------ SHIP VERSION 8.00 Build 2255 2/13/24 ------

* Fixed an issue with IMPORT PRINT adding UTF16 parameter instead of UTF8

------ SHIP VERSION 8.00 Build 2254 1/31/24 ------

* Fixed an issue where the Big 5 ASCII code page was incorrect for Traditional Chinese

* Fixed an issue in RM where closing first activity will close the result altogether

* Fixed an issue in RM where Form Answers were not showing up in the activity dialog

------ SHIP VERSION 8.00 Build 2253 1/30/24 ------

* Fixed an issue with using a duplicated view

------ SHIP VERSION 8.00 Build 2252 1/25/24 ------

* Reinstated the AS/400 FDF file format for External Definitions in DDW

* Fixed an issue in Create Table List

------ SHIP VERSION 8.00 Build 2251 1/22/24 ------

* Fixed an issue with defining dBase files that contained a field named PAGE

* Fixed an issue with the File History using incorrect table names when PRESORT is involved

* Fixed an issue where RETURN variable wasn't available for use

------ SHIP VERSION 8.00 Build 2250 12/15/23 ------

* Fixed an issue with IMPORT EXCEL for non-English versions

* Fixed an issue with Chinese sorting not using the correct sorting algorithm, regardless of which one was chosen

------ SHIP VERSION 8.00 Build 2249 12/13/23 ------

* Improved IMPORT EXCEL so it could handle a non-standard file like it did in V7 (Blank column headers)

* Fixed an issue for IMPORT ODBC

* Fixed an issue where blank lines introduced into the Joblog.txt file wouldn't allow the Arbutus Server service to start

------ SHIP VERSION 8.00 Build 2248 12/11/23 ------

* Updated the server install to add zip files for RM

------ SHIP VERSION 8.00 Build 2247 12/11/23 ------

* Fixed an issue with CLASSIFY to enhanced results where it was displaying skewed results when using a very long field

------ SHIP VERSION 8.00 Build 2246 12/4/23 ------

* Removed the LOCAL server from the list when using Import->Server Data

* Fixed an issue with the Citrix install

* Fixed an issue reported with EXPORT to Excel

* Fixed an issue with the server stub

* Fixed an issue with RM where apostrophes weren't allowed for workflow names

* Fixed an issue with Create Table List for non-Latin-based language databases not rendering the table list file properly

* Fixed an issue with IMPORT PRINT for MVS not writing the syntax to the log file

* Fixed an issue with STRATIFY when using fields from the view

* Fixed an issue with defining multiple tables via ODBC when SET FOLDER was being used (broken in V7)

------ SHIP VERSION 8.00 Build 2245 11/9/23 ------

* Fixed an issue with Pivot tables where we removed the non-breaking space character at the byte level instead of character level and it caused issue in Chinese

------ SHIP VERSION 8.00 Build 2244 11/8/23 ------

* Fixed an issue with deleting variables for MVS

* Fixed an issue with importing an Excel file if Edit Query was used and a leading column was blank

* Fixed an issue reported regarding Admin->Scheduling causing GPF

* Fixed an issue with Admin->Scheduling reporting "Unknown" for successful procedures instead of pass

* Fixed an issue where highlighting a datetime field in the view and clicking the CLASSIFY icon caused the enhanced result to render only 1 date

* Fixed an issue where the SAVE checkbox for DSNs that had no user credentials was disabled even when credentials were entered

* Fixed an issue with Portuguese DISPLAY VARIABLES missing a space after the variable type

------ SHIP VERSION 8.00 Build 2243 10/27/23 ------

* Fixed Manual Activation

------ SHIP VERSION 8.00 Build 2242 10/26/23 ------

* Added the new connectors to the Hub install

* Fixed an issue with exporting an empty table to Excel

* Fixed an issue with extracting server data locally in a specific scenario involving deleting variables first

* Fixed an issue with extracting server data locally if local file compression was on

* Fixed an issue with Enhanced Profile filtering

------ SHIP VERSION 8.00 Build 2241 10/23/23 ------

* Fixed an issue with EXTRACT APPEND LOCAL

------ SHIP VERSION 8.00 Build 2240 10/23/23 ------

* Fixed an issue where running a second Enhanced Profile while you had one opened would cause GPF

* Fixed an issue where EXTRACT local of two files wouldn't let you join them together afterwards as it said the server was different

------ SHIP VERSION 8.00 Build 2239 10/19/23 ------

* Fixed an issue with the installs for Citrix and ConnectPlus

------ SHIP VERSION 8.00 Build 2238 10/19/23 ------

* Fixed an issue with the installs having extra spaces for the driver/DSN names that caused multiple instances to appear

------ SHIP VERSION 8.00 Build 2234 10/17/23 ------

* Changed ship install

------ VERSION 7.00 Build 2004 6/21/23 ------

* Added new digital signature

------ VERSION 7.00 Build 2003 /8/23 ------

* Updated SmartLink logging

* Improved domain error message for group licenses

------ VERSION 7.00 Build 2002 5/23/23 ------

* Updated installs to include proper driver names for SAP Concur and DynamoDB

* Fixed an issue where view formatting was always looking for NA decimal versus the default (caused issue with non-English)

------ VERSION 7.00 Build 2001 5/9/23 ------

* Changed SmartLink to sort on keys before "striping/stitching" long records together

* Updated installs to include a required DLL for the PDF converter

------ VERSION 7.00 Build 2000 3/28/23 ------

* Added new PDF conversion utility
